PROJECTS

Portfolio | React.js, Tailwind CSS, EmailJS
Mar 2025

- Designed and developed a fully responsive personal portfolio using **React.js** and **Tailwind CSS**, showcasing projects, skills, and contact form.
- Implemented a dynamic and interactive UI with modular components such as `Navbar`, `Hero`, `Skills`, `Projects`, and `Contact` using `useState`, `useEffect`.
- Enhanced UX with **lazy loading**, **smooth animations**, and **code splitting** for fast load times and performance.
- Integrated **EmailJS** to handle contact form submissions without a backend; real-time form validation included.
- Deployed on **Vercel** with custom domain and GitHub-based CI/CD; ensured accessibility and SEO-friendly structure.

Devpost | MERN Stack (MongoDB, Express.js, React.js, Node.js)
Feb 2025

- Developed a full-stack blog platform enabling secure user authentication, post creation, editing, deletion, and likes/dislikes.
- Implemented JWT and cookie-based authentication in **Express.js** backend with role-based access control for admin features.
- Built responsive **React.js** frontend with reusable components (e.g., PostList, CreatePostModal) and integrated infinite scroll for dynamic content loading.
- Integrated image/video uploads with previews, profile customization, and comment interactions; optimized UX for both mobile and desktop.
- Designed backend REST APIs with **MongoDB** for scalable data storage; used `Mongoose` for schema validation and efficient queries.

Food Ordering | React.js
Dec 2024

- Developed a food ordering single-page app with dynamic UI using **React.js**, enabling users to browse, search, and order meals across categories.
- Implemented filtering by meal type (Breakfast, Lunch, Snacks, Dinner) and real-time search with stateful UI using `useState`.
- Integrated a cart-like system to simulate item selection and ordering flow; improved interactivity with responsive hover/focus states.
- Applied responsive design with CSS Grid/Flexbox for optimized usability across devices.
- Deployed on GitHub Pages for easy access and maintained with Git version control.

EXPERIENCE

Novem Controls
Jan 2025 – Jun 2025

Intern – MERN Stack Developer
Mohali, India

- Undergoing hands-on experience with **MongoDB, Express.js, React.js, Node.js** (MERN stack).
- Working on real-world projects involving RESTful APIs, frontend interfaces, and backend integration.

Solitaire Infosys
Jul 2024 – Sep 2024

Frontend Developer Intern
Mohali, India

- Completed 2-month training in web development using **HTML5, CSS3, JavaScript, and React.js**.
- Built responsive UI components and worked on project assignments.

TECHNICAL SKILLS

Languages: JavaScript
Technologies/Frameworks: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Node.js, Express.js, MongoDB
Developer Tools: VS Code, GitHub, Vercel, Netlify, Render
Coding Platforms: LeetCode, GeeksforGeeks

EDUCATION

Lyallpur Khalsa College Technical Campus
2021 – 2025

*B.Tech - Computer Science and Engineering — CGPA: **6.57***
Jalandhar, Punjab

T.W.E.I.S.N. Senior Secondary School
2020 – 2021

*Intermediate (XII) — Percentage: **70%***
Phagwara, Punjab
